

How do you want to make your SFINCS model?

I want to click a model interactively

[Delft Dashboard GUI](#)

← used by DDB

Status: working for regular & subgrid
Future: no further developments

I want to use text files or scripts

Matlab based

[Matlab OET script
toolbox](#)

Status: working for regular & subgrid
Future: no further developments

Python based

[HydroMT-SFINCS](#)

I want to script my
model from scratch

[Use the underlying
python functions](#)

I want to use pre-
defined functions

[Use the textbased
infile option](#)

Status: working for regular & subgrid (beta)
Future: quadtree, waves, ...
